

4G/GSM INTERCOM I10K | 1000 USER 4G/GSM INTERCOM

Typically mounted at the entrance of complexes, flats or outside your house. The 4G/GSM Intercom gives you the ability to answer the intercom and open your gate from anywhere in the world. No wire is needed as with conventional intercom installations.

Features

- SIM card is housed in lockable metal enclosure inside the premises
- Missed call feature to open gate (no operational costs)
- Can open gate from keypad or cellphone while on a phone call
- Automatic hangup
- Up to 10,000 telephone/cellphone numbers
- Pre-paid operation, retrieve and add airtime via SMS
- Programmable via USB (computer) or SMS (remotely)
- Robust BPT rubberized splash proof keypad design
- Auto-answer on call
- May be used with a handset in guardhouse applications
- Two gate stations may be used on a single controller (eg. entry and exit)
- You can upgrade from BPT i500; back up your i500 data and load it onto the i10k

GATE STATIONS | 4 OR 400 USER

Up to 4 numbers may be dialed by pressing the corresponding call button. Up to 400 numbers may be added for missed-call gate-opening function. The 4 button and 400 button user keypad units can be used on the same system.
